

## Retraction Note: Study of the determinants of condom use among students at the University of Lake Tanganyika in Burundi: A cross-sectional analytical study

The Editorial Office has identified a case of duplicate publication involving the article listed as Reference [1]. Specifically, a substantially similar version of the same work was also published elsewhere (Reference [2]). Duplicate publication violates the journal's publication ethics policies and compromises the integrity of the scholarly record.

Upon becoming aware of this matter, the Editorial Office of *Adolescência e Saúde* contacted the corresponding author, Jean Berchmans Niyonzima, on multiple occasions and requested an explanation and clarification. No appropriate response was received. Following consultation and agreement between the editorial offices of the two journals, it was decided that the article published in *Adolescência e Saúde* (Reference [1]) would be retracted, while the version published in *Oral Sphere Journal of Dental and Health Sciences* (Reference [2]) would remain part of the scholarly record.

This retraction is issued in accordance with the guidance of the Committee on Publication Ethics (COPE). The retracted article will remain accessible for the purpose of maintaining the scholarly record, but it will be clearly marked as retracted.
